Statement regarding Bioengineered Material in Ethyl Acetate

To the best of our knowledge, Viridis Chemical hereby confirms that the Ethyl Acetate produced at its plant in Columbus, Nebraska does not contain detectable genetic material.

Based on this, this product stated above will not, on its own, require the labeling of a food item as Bioengineered pursuant to the National Bioengineered Food Disclosure Standard issued by the United States Department of Agriculture.

This statement is valid until December 31, 2022.

Viridis Chemical NE Asset Co. 1, LLC

A handwritten signature in black ink, appearing to read "Eric Lawrence", written over a light blue horizontal line.

Eric Lawrence
